Signature Assignment: Assessment Application and Intervention Case Study (25 points)

Select a target infant or young child with special needs ages 12 month – 5 years and create a comprehensive assessment and intervention plan by the end of the quarter:

- Administer different types of assessment (standardized, observational, etc.); the type of assessment will be determined in collaboration with service delivery personnel.
- Complete an assessment report that includes descriptions of the assessments used, results, implications for service delivery and reflection on the process.
- Create an intervention and support plan based on your assessment. The plan must include year-long goals, strategies and specific plans for using the classroom environment, daily schedule, teaching strategies, and curriculum materials and activities.
- Grading Rubric:
  - Description of assessment methods
  - Summary of results
  - Implications for program/intervention planning including sample year-long goals and short term objectives
  - Reflection on processes involved in assessment (potential pros/cons of each type of assessment, challenges, etc.)
  - Organization and clarity of writing
