Staff Development Project

Design and present a staff development in-service with a curricular focus area either at your site or another facility. You will be expected to prepare a Power Point presentation. Additional media should include; an agenda, charts, graphs, and/or appropriate journal articles for your teacher in-service. No professionally prepared materials allowed.

The purpose of this assignment is to educate an audience. To do this you will need to demonstrate, model and/or show your staff how to do something and why it is important to present curriculum in a particular manner to improve student understanding. Be as creative as you wish but make your curricular focus and the message you’re presenting is very clear. You will need to video your staff development/in-service and show a clip of this video to the class. This will be shared with the class in a 7-10 minute video and Power Point presentation. Print a copy of your presentation plan, which will include your purpose, introduction and activities as well as any pertinent information for all class participants. Post on TaskStream after class presentation.
