Fluency Lesson Plan Project: The purpose of this project is to insure that candidates are able to design and implement research-based fluency lesson plans for students at all grade levels. This signature assignment has two parts. First, candidates will be expected to develop and implement 3 lesson plans designed to promote and enhance fluency for one of the following grade levels:

Category 1: primary (K-2), intermediate (3-5)

Category 2: middle (6-8) or secondary (9-12).

For each lesson created, candidates will create an original artifact that can be used to enhance the lesson. Artifacts include, but are not limited to, manipulative(s), games, original worksheets, and other appropriate materials that can be used to teach the lessons. Each plan should contain the following elements:

Grade
Objective
Materials/Resources Needed to Complete the Lesson
Procedures for Instruction
Skill Practice
Follow-up & Integration of Skill
Self-Reflection

A good “rule of thumb” is to have enough information so that anyone who picks up this lesson plan will be able to implement it easily and with success. Please refer to the rubric for specificity of what is contained in the elements. These lessons may be carried out in your own classroom.

The second part of this assignment is to choose another grade level (from the category not used for the first part of the assignment) and create an additional fluency lesson plan. This lesson plan should once again contain all of the information, materials, and directions to implement it, but does not have to be carried out. Please include all of the elements listed above. It, too, should contain enough information so that it can be implemented easily and successfully, but does not need to be implemented.
